Production Enhancement Solutions

MPW Industrial Services is the leading service provider of integrated technology-based Industrial Cleaning, Facility Management and Support Services, Industrial Water in the United States and Canada. With headquarters in Hebron, Ohio, MPW has been responding to their customers' needs from our network of more than 40 locations since 1972. MPW partners with customers to enhance operational efficiencies, improve reliability and minimize costs.

With state-of-the-art equipment and the most experienced, safety trained workforce in the industry, MPW provides customers with a diverse range of production-enhancement solutions. Being a leader in innovation and maintenance, MPW continually invests in research to develop specialized tooling and proprietary mobile equipment systems to meet the ever-changing requirements of our diverse customer base. Industries served: Power Generation, Pulp and Paper, Steel, Manufacturing, Automotive, Oil and Gas, Chemical, and Aerospace.

CAPABILITIES:

- Health & Safety Supervisors On-Site
- Safety Tailgate Meetings
- Safety Observation Documentation
- Health & Safety Audits
- JSA's (Job Safety Analysis)
- Safety Improvement Committees
- OSHA Hands-On/Refresher Training
- Job Performance Evaluations

MPW's safety coin was instituted into the workforce in 2006. Every employee - from corporate level to field personnel - carries the coin as a constant reminder of their commitment to safety.

Health & Safety

Since 1972, **MPW Industrial Services** has remained the leading single source provider of integrated, technology-based Industrial Cleaning, Facility Management, Container Management, and Water Purification services in North America. MPW was one of the first industrial cleaning companies to establish a full-time safety and training program. MPW's comprehensive Health & Safety Program serves as a role model for the industry.

MPW recognizes that all associates must be committed to a safe working environment and that they must be totally engaged in the process if safety goals are to be achieved. This is MPW's commitment to our customers as we continue to set and improve upon the highest quality standards.

MPW links its safety performance to several procedures designed to deliver concrete safety improvements within industrial and manufacturing settings. The new hire safety course, "MPW University", is a stringent requirement prior to any associate entering the field. This course provides the OSHA 10 Hour Certification (lockout/tagout, confined space, fall protection, water blasting, wet/dry vacuum, and many others). The foundation of the MPW safety program is the utilization of job specific JSA's (Job Safety Analysis) for all tasks performed.

Pioneers in Health & Safety Training

INDUSTRIAL CLEANING GROUP

CAPABILITIES:

24/7 Emergency Response
 Vacuuming – Wet/Dry
 Hydroblasting

- High Pressure
- Ultra-High Pressure Cleaning & Cutting

Remote Monitoring and Control
Softening

INDUSTRIAL WATER

MPW Industrial Water provides world-class service solutions for industries most critical water purification requirements. MPW's Deminator, the worlds largest mobile demineralization system, provides rapid and reliable emergency response service through our network of strategically located service facilities and 24/7 Logistics Center.

Our fleet of mobile filtration and reverse osmosis systems serve more advanced process capabilities where water supply conditions are more challenging and

produced water purity levels are more demanding. For more permanent solutions, MPW builds, installs and services turnkey water purification systems designed to meet the specific plant requirements. Our build, own, operate, maintain (BOOM) programs provide both performance and availability guarantees, backed up 100% by the MPW mobile fleet.

When high purity produced water is critical to the operation, MPW's emergency and extended term service solutions keep you online.

Premier Provider for all Industrial Water Needs

MPW Facility Management & Support Services (FMSS) has provided its customers with a safety first, world-class maintenance performance. MPW applies a turnkey approach to Facility Management by partnering with clients to provide daily on-site production enhancement and support services.

MPW has a strong presence in the automotive industry, particularly paint shops, but is also well versed in a wide variety of manufacturing and production environments. By selecting MPW's Facility Management Team, customers benefit from MPW's innovative methods which reduce customer downtime, improve customer productivity and quality, and minimize operational costs. Strategic sourcing allows customers to focus on their core competencies instead of devoting

plant resources to determine the best approach for maintenance and cleaning solutions. Qualified technicians supplement customers' labor pools with full-time and temporary employees. MPW also improves system reliability by evaluating and documenting current practices and engineering time saving, efficiency improving alternatives for customers. The Facility Management Team stringently adheres to a quantifiable performance plan developed according to plant specifications. The high level of awareness related to plant requirements allows MPW to make informed suggestions about what equipment and supplies are necessary to perform individual tasks, which results a reduction of overhead costs to the customer.

Partnering for Daily On-Site Needs
